Dear Supplier,

To comply with U.S. legislation intended to further the humanitarian goal of ending violent conflict in the Democratic Republic of the Congo (DRC), our customers are requiring TI Automotive to canvass our entire global supply base and disclose whether the products they make contain “conflict minerals.” Tin, tantalum, tungsten and gold (also referred to as 3TG) originating from the DRC and adjoining countries are defined as conflict minerals in the legislation.

Please respond to this email survey by answering this critical question below:

Do any products that you supply to TI Automotive contain 3TG? (If the answer is “Yes”, complete the attached Conflict Mineral Reporting Template (CMRT) form and submit form to conflictminerals@us.tiauto.com.)

Yes
No

Comments/Questions:

Note:

This is a customer requirement; a response is required. Failure to submit a response may preclude your company from future sourcing.

If your email service is not Microsoft Outlook, this email may not show the full features. In this case, please send an email with the response of “Yes” or “No”.

Thank you for your immediate attention and cooperation.
